REPORT OF THE CENSUS OF THE THREE PROVISIONAL DISTRICTS  
OF THE NORTH-WEST TERRITORIES, TAKEN IN 1885.

---

To His Excellency the Most Honourable Sir HENRY CHARLES KEITH PETTY-FITZMAURICE, Marquis of Lansdowne, in the County of Somerset, Earl of Wycombe, of Chipping Wycombe, in the County of Bucks, Viscount of Caln and Calnstone, in the County of Wilts, and Lord Wycombe, Baron of Chipping Wycombe, in the County of Bucks, in the Peerage of Great Britain; Earl of Kerry and Earl of Shelburne; Viscount Clanmaurice and Fitzmaurice, Baron of Kerry, Lixnaw and Dunkerron, in the Peerage of Ireland; Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George; Governor General of Canada, and Vice Admiral of the same, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit the Report of the Census of the three Provisional Districts of the North-West, Assiniboia, Saskatchewan and Alberta, taken in the month of August of the year 1885.

The whole respectfully submitted.

JOHN CARLING,  
*Minister of Agriculture.*

Department of Agriculture,  
OTTAWA, February, 1886.

## CANADIAN STATISTICS.

---

### CENSUS OF THE THREE PROVISIONAL DISTRICTS OF THE NORTH- WEST TERRITORIES TAKEN IN 1885.

---

To the Honourable JOHN CARLING,  
Minister of Agriculture.

SIR,—I have the honour to lay before you the Report of the Census taken in the North-West Territories in 1885, and to say that the whole can now be placed in the printer's hands.

The detailed statement of the proceedings in connection therewith will be found in the introduction to the Report.

I have the honour to be, Sir,

Your obedient servant,

J. G. G. LAYTON,

*Statistical Officer.*

Statistical Office, Department of Agriculture,  
OTTAWA, February, 1886.

---

# CENSUS OF 1884-5.

## INTRODUCTION.

A Census of the three Provisional Districts of the North-West Territories was taken under authority of the Census Act, assented to on the 1st May, 1885 (48 Vic., Cap. III.)

As regards population, &c., it is a statement of facts existing on the 24th day of August, 1885, while all information relating to the Census year is for the twelve months immediately preceding that day.

The *de jure* system was adopted for the enumeration of the population.

The enumerating officers consisted of three Commissioners and one Assistant Commissioner whose duties were, generally, to superintend the preliminary arrangements and to instruct the enumerators, severally appointed for each district, there being 28 enumerators and 4 commissioners or 32 in all.

Mr. Layton, the Statistical officer, represented the Department and instructed the commissioners on the ground.

Each enumerating officer was furnished with a Manual of Instruction and Model Schedule, as a guide in making the entries.

The enumeration schedules were five in number, as follows:—

SCHEDULE 1—*Nominal return of the living*, containing 19 columns for the insertion of the answers to the questions on the following subjects: Residences, names, sexes, ages, birth places, religions, origins or nationalities, professions, married or widowed, state of education, and, lastly, infirmities, as deaf and dumb, blind and of unsound of mind.

SCHEDULE 2—*Public Institutions and Industrial Establishments*, containing 20 columns, showing the nature of the institution and the number of inmates; the kind of industrial establishment, capital invested, number of hands employed, wages paid, the value of raw material and articles manufactured and their value.

SCHEDULE 3—*Cultivated Lands, Field Products*, containing 26 columns.

SCHEDULE 4—Containing 30 columns relating to *Live Stock, Animal Products, Fur bearing Animals and Pelts*.

SCHEDULE 5—Containing 25 columns, relating to *Fisheries, Products of the Forest, Minerals and Prairie Lands*, broken up and seeded.

These Census schedules were to be, and have been, filled up by the enumerators going in person, from house to house, within the limit of the sub-district or division thereof assigned to him.

The columns of Table I headed "Temporary Dwellings" refer to temporary dwellings as vessels, shanties, tents and wigwams. There was only one vessel inhabited on 24th August, 1885. The words *Shanties, Wigwams* and *Tents* are intended to denote the temporary dwellings of the Indian population, on their several reserves, and of the temporary lodges of the wandering or nomadic Indians.

TABLES II, III and IV,

Need no remarks.

TABLE V.

Ages of the people are counted from the last birthday and are recorded as they were given. The column headed under one year, therefore, represents a greater or lesser fraction of a year, and those severally headed 1 to 2, 2 to 3, successively, represent the numbers of persons living on the Census day at one year of age last birthday and two years of age last birthday.

In this and other tables there is a column headed "not given" and, as may be supposed, is largely composed of Indian population.

TABLE VI to X,

Inclusive, require no explanation.

TABLE XI.

Occupations of the people are arranged alphabetically.—Occupations somewhat similar to each other are thus necessarily separated one from the other. But it is desirable and necessary to give the occupations followed in each district separately and this is deemed the simplest way of doing it.

Persons engaged in more than one occupation are not put down severally to each, but to that which they happened to be following, at the taking of the Census.

The numbers specified as following certain trades and industrial pursuits include all engaged in them as laborers and apprentices as well as masters and assistants.

Details in reference to the occupations of the people are farther supplemented under the head of Industrial Establishments at Table XIX; but of course there can be no concise agreement between the two statements; the one giving the number of hands employed at the several industries, it may be a week or a month or a year, the other giving the occupation to which he devotes the principal part

of his time. As regards the female population it must be borne in mind that the enumeration does not pretend to give the occupations of all, but only as far as they are engaged separately as heads of families, servants, &c.

## TABLE XII

Is a statement of the component parts of the several classes of occupations given in the preceding Table XI, from which it is abstracted.

## TABLE XIII

Is a statement of the number of churches belonging to the several denominations and of benevolent and educational establishments.

## TABLE XIV.

Occupiers of lands and lands occupied. This table needs some little explanation. It will be noticed that under the sub-heading "Total occupied", Alberta shows the largest quantity occupied, but the smallest cultivated; the explanation is that it is here where the great ranches are situated. Assiniboia comes nearer Alberta in occupied lands, but in cultivated lands it has about ten times the quantity, the one being the cattle feeding district and the other the wheat growing district.

## TABLES XV and XVI

Require no particular explanation.

## TABLE XVII.

Furs and Pelts. Much difficulty was experienced in collecting the materials for this table, nor is it supposed that they have been reported with absolute accuracy. In other censuses that have been taken, the quantities have always been obtained from the "hunters," but in this instance that rule was departed from, because of the impossibility of obtaining the information from many of the Indians and then on the other hand we could not be sure that they had not been twice reported, that is, once by the Indians who sold to the traders and again by the traders to whom we were compelled to resort for information. It may be in this way that the thirty six buffalos are reported, they having been killed by resident Indians but outside of either of the provisional districts and reported by residents.

## TABLE XVIII.

Only one explanation appears necessary to this table. It is with regard to the "Census standard" for measuring Pine, Spruce and other logs. The existing diversities in the mode of measuring these logs in different parts of the Dominion appear to render this necessary in order that comparisons may be made. The standard log is made equal to 100 square superficial feet of lumber or board measure of one inch thick.

## TABLE XIX.

Needs no special explanation.

It was deemed advisable to depart from the ordinary way of enumerating people, in regard of Indians; the objections to such a course were several, the primary one being the difficulties in regard to languages which was insurmountable; besides there is an excellent authority for stating that an attempt to enumerate the Indians in the regular manner would tend to excite them; that they would not understand the real object and would be sure to attribute it to a wrong and perhaps a mischievous motive, so that the only way was deemed to be to call in the aid of the different agents, who have a record of all Indians receiving supplies and treaty payments from the Government.

It may here be remarked that most of these Indians are heathens and many have several wives, but in the agents' books these are not so classed but, with the exception of one to each Indian, are put down as so many heads of families, sometimes with children and are called widows. Some of these squaws have either left or been dispensed with by the Indians after years of cohabitation, sometimes, taking their children and thus making a separate family. We thus found many marked as widows whom we knew were not widows but wives, but neither agent nor any one else could say whose wife.
